- ◆ Bath House with laundry (6 washers/7 dryers)
- ◆ Clubroom

11 Peak Energy Saver 200G installed

Phase 1 was fully outfitted with Peak Energy Savers when the park opened in January 2018. This energy efficient park has all LED lighting, high efficiency 15 seer HVAC, pool pump with VSD, R-rating of 150% on bath house; heaters, water heater and clothes dryers are on propane. *Phase 2* will be installed with an additional 8 Peak Energy Savers in the Fall 2019.

John T. Baker II says...

"As a new construction facility, I was able to utilize numerous energy efficiency products. I was introduced to Peak Energy Savers at a KOA National Convention Expo.

Peak Energy Savers were installed park-wide. Not only do they reduce our electricity consumption, they also allow our equipment to operate more efficiently which will extend their operational life.

Frankly, this product appears to be a complete no-brainer. **What other product can boast an initial investment break-even in under one year?**

Austin East KOA has two additional construction phases remaining and I will install Power Savers throughout. Beyond being a great product, the customer support is exceptional."

**- John T. Baker II, Owner
Austin East KOA**

More Benefits of Peak Energy Savers
