*Compared to April—August 2011*

### Mayor Joubert says:

**Mayor  
Gerald Joubert**

**“Continually moving our city forward  
while saving money is very important  
to me. And when we can be on the  
forefront of technology, especially with  
green initiatives, that’s a bonus  
for our community.”**

### More Peak Energy Saver Benefits

90 day  
money  
back  
**guarantee**

With a **quick payback**,  
your city enjoys a great ROI  
and reduced net operating  
costs.

Peak Energy Savers can  
also help **reduce voltage  
sags** that can damage  
sensitive electronics.

Motors run 10%  
cooler which can  
**increase** the life-  
time of the motor.

The **Peak Energy Saver** recycles electricity in your home or small business. By installing it near your circuit breaker panel with it's own dedicated breaker, the Peak Energy Saver works with everything (non-resistant loads) in your home or business.

- Recycle the electricity used in your electric appliances, motors, & transformers
- Get a quick return on your investment
- 90 day money back guarantee – if your electric bill does not show energy savings, get a full refund
- Help the environment by conserving electricity without sacrificing comfort
- Suppress surges that can cause damage to electronics
- Filtering out harmonics and reducing voltage spikes on the power lines
- Motors run 10% cooler which can increase their lifetime
- 5 year manufacturer's warranty
- UL listed for safety
- Easy to install

### The **Peak Energy Saver**™ for Business Applications.

The Peak Energy Saver from Peak Energy Technology reduces the amount of power bought from the electric utility by storing electricity otherwise lost from the motors and transformers. The unit sends back this stored electricity back to your appliances, decreasing the kWh. Lower kWh = lower electric bills!

- Save between 10%-25% of monthly kWh usage. Most customers see a 15-22% savings.
- Peak demand charges are reduced by lowering the current needed to start each motors.
- Power factor charges are reduced, if not eliminated.

Money isn't all that you are saving when you use Peak Energy Technology products. It's an energy-wise purchasing decision that will help your business meet it's goals for **'going green.'**

Peak Energy Technology has units to fit your business requirements from single phase to three phase and from 240 volts to 600 volts along with the expertise to evaluate the best system for your needs.

**Special Note:** Special consideration must be given whenever there is a power generator present. The Peak Energy Saver must be installed to automatically disconnect from the circuits whenever an automatic transfer switch switches the generator into circuit. *If a manual transfer switch is used*, then the Peak Energy Saver must be de-energized by turning off the circuit breaker prior to powering the property by the generator. The Peak Energy Saver circuit breaker can be turned on only after the power has returned from the power company and the generator is turned off. Failure to follow these considerations could result in damages not covered by the product warranty. Peak Energy Savers are UL tested for safety.

### About Peak Energy Technology

Peak Energy Technology helps RV Parks, cities, hotels, restaurants, small businesses, and homeowners to recycle electricity and save money by reducing the amount of electricity they purchase. With a money back guarantee, this technology is now cost effective for everyone. See demo on our website.
