Myrtle Beach Travel Park says ...

Peak Energy Savers Installed:

- ◆ Office & Store
- ◆ 350 RV Sites
- ◆ Adult & Kiddie Pool
- ◆ Winter Rec Hall
- ◆ 8 Bath Houses

72 Peak Energy Saver 200G installed

125 Acres includes 538 Park Models & 650 RV Sites. “50% of our campground is installed initially with plans to fully outfit our park.”

“We saw an increase in our annual occupancy and still got an **11% savings** on our electric bill after installing Peak Energy Savers.

Our utilities are a big chunk of our operating costs. With the increased occupancy, our sewer and water went up, but our electricity usage went down. As a result, we saved about **\$36,000** over the entire year. If our kWh rates had not increased **4.8%** over previous year, we would have saved *even more!*

We have enjoyed working with Peak Energy Technology to save money on our electric bills. We have installed one on our house too! Buying Peak Energy Savers for Myrtle Beach Travel Park is truly a no-brainer.”

- Travis Thompson
General Manager, Myrtle Beach Travel Park

More Benefits of Peak Energy Savers

90 day money back **guarantee**

With a **quick payback**, enjoy a great ROI and reduced net operating costs.

Peak Energy Savers can also help **reduce voltage sags** that can damage sensitive electronics.

Motors run 10% cooler which **increase** lifetime of motor.
