

Recycles 19% on Electricity

with
Peak Energy
Saver

Certified Electricity Recycler

Recycled an average of 11,355 kWh monthly or \$1,501 savings with the Peak Energy Saver.

Payback in 2 Months

Their carbon footprint reduction is the same as planting 2,344 trees annually.

Fall Creek RV Park Story...

"When you stay at Fall Creek RV Park the most difficult decision, you'll have to make is whether to go to the lake or visit the historic City of Granbury. We learned about Peak Energy Savers at the Texas Association of Campground Owners (TACO) trade show.

After talking with other campground owners and learning of their success, we knew we were ready to see this savings multiplied across our five RV Parks. We saw our electric bill go down at Fall Creek RV Park 19% over the first two months of analysis, saving over \$3,000 on our electric bill. We recovered our cost of the (7) Peak Energy Savers in two months. That is just good business!

The business environment that RV parks operate in these days calls for owners and managers to look for ways to reduce overhead in every way possible. Peak Energy Savers is something that all of us in the business should consider. Not only is the product great, but customer service goes above and beyond to ensure the product is delivered in a timely fashion, installed properly and most importantly measuring results to ensure the cost savings falls to the bottomline.

- Fred Ream, Partner

Installation

- (7) Peak Energy Savers installed:
- +67 RV Sites
- Office
- Bath House
- Laundry

More Benefits

90 day money back guarantee With a **quick payback,** enjoy a great ROI and reduced net operating costs. Peak Energy Savers can also help **reduce voltage sags** that can damage sensitive electronics. Motors run 10% cooler which can **increase** the lifetime of the motor.

PEAK ENERGY SAVER

The **Peak Energy Saver** recycles electricity in your home or small business. By installing it near your circuit breaker panel with it's own dedicated breaker, the Peak Energy Saver works with everything in your home or business.

- Recycle the electricity used in your electric appliances, motors, & transformers (non-resistant loads)
- · Get a quick return on your investment
- 90 day money back guarantee
- Help the environment by conserving electricity without sacrificing comfort
- Suppress surges that can cause damage to electronics
- Reduce voltage spikes
- Motors run 10% cooler which can increase their lifetime
- 5 year manufacturer's warranty
- UL listed for safety
- Easy to install

As Seen On: DESIGNING

The Peak Energy Saver™ for Business Applications

The Peak Energy Saver from Peak Energy Technology LLC reduces the amount of power bought from the electric utility by storing electricity otherwise lost from the motors and transformers. The unit sends back this stored electricity back to your appliances, decreasing the kWh. Lower kWh = lower electric bills!

- Save between 10%-25% of monthly kWh usage. Most customers see a 15-22% savings.
- Peak demand charges are reduced by lowering the current needed to start each motors.
- Power factor charges are reduced, if not eliminated.

Special Note: Special consideration must be given whenever there is a power generator present. Contact your sales representative or technical support to discuss your specific situation.

Help the environment; Get listed on RecycleElectricity.Net

Money isn't all that you are saving when you use Peak Energy Technology LLC products. It's an energy-wise purchasing decision that will help your business meet it's goals for 'going green.' There are units to fit your business requirements from single phase to three phase and from 240 volts to 600 volts. Once your savings is verified through detailed analysis, your business will be listed as a Certified Electricity Recycler on "Who's Who."

Every 1000 kWh saved is the same as planting 16 trees.
